Claim Rejections - 35 USC § 112

Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 6, recites a "continuous partial area" of the "heating plate" (?). The Examiner queries the exact location of this "continuous area," and the meaning of "continuous" in this context.

Claim 2, at line 3, recites "[aufspannen]," rendering the claim unclear. Claims 3 and 11 also contain German text.

Also in claim 2, lines 2-4, it is not clear whether expansion of the plate or the body is referred to by "the expansion of the continuous partial area... in... directions which mount the plane of the heating plate... does not exceed 50% of the maximal expansion of the heating plate." This appears to specify that the expansion of the "base" is no more than the expansion of the "plate." Is this so? Moreover, "two directions which mount" is inherently unclear.

In claim 6, line 2, "**essentially** only on one edge area" (Examiner's emphasis) is indefinite since "essential" and "non-essential" regions are not identified.

In claim 11, line 3, "**essentially** over one plane" (Examiner's emphasis) is indefinite since "essential" and "non-essential" regions are not identified. Further, if "plates... extending essentially over one plane" means "substantially planar plates," this should be so recited.

The claims are generally indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors. The claims should be rewritten in idiomatic English.

Claim Objections

Claims 7-10 and 12-15 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim may not depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 7-10 and 12-15 not been further treated on the merits.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by DE20006891.

Referring to Figs. 2-4 and pages 2-3 of the translation, DE'891 discloses the invention as claimed, including a heating plate 4 attached to a base 2 in a continuous "partial area... smaller than the remaining surface of the heating plate," and the expansion of the recited "area" is inherently (or trivially) less than 50% of the plate expansion in each of its dimensions, a "central borehole" 5 and corner "boreholes" 50, where the plate is attached at "one partial area" around each "borehole" since portions of the plate in said "areas" are not attached.

Allowable Subject Matter

Claim 11 would appear to be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
